Allowable Subject Matter

Claims 1, 37 and 38 are allowed.

The following is an examiner's statement of reasons for allowance:

The primary reasons for the allowance of the independent claims 1, 37 and 38 are the inclusion of the following limitation that is not found in the prior art and they are uniquely distinct features. The closest prior art is Brandt et al (6,125,384) (hereinafter Brandt). Brandt discloses a system for providing services to users that includes a web server that controls the users' access to online services by authenticating them. Brandt also discloses an Internet application gateway that generates a conversation identifier for the request of each user and assigns the identifier to a service which is provided to a user. This art fails to anticipate or render the following limitations:

"Claim 1:an input-output control unit which receives data from said service provision unit, and the output job code, and outputs data associated with the output job code,

wherein

data in the database is read out through operation from said input-output control unit".

"Claims 37 and 38: receiving data from a service provision unit corresponding to a data output process requested by a user;
receiving an output job code from said service provision unit corresponding to the data output process;
reading said data from an input-output control unit".
